To Whom It May Concern:

The purpose of this letter is to provide a professional reference in support of TKW Consulting Engineers. As Vice President for Administrative Services and Finance at Florida Gulf Coast University, I directly oversee our Department of Facilities Planning, who has used TWK on many projects in the past twelve years that we have been building our campus here in Southwest Florida. I can attest to the excellence in the quality of their work, the firm's ability to operate within their original time frame, and their ability to provide accurate contract estimates. Also, there were no excessive change orders incurred during their projects.

My overall rating of TKW's performance would be outstanding. Should you have any further questions about TKW or any specific information you are seeking about their job performance, feel free to contact me at 239-590-1119.

Sincerely,

Joseph Shepard, Ph.D.

Vice President for Administrative Services and Finance
